

## WROCLAW APP

As part of organizing an unforgettable incentive event, you should think about some applications, which can be easily used by the participants. All of these applications are well adapted to different age groups. It's worth recommending some of these amazing virtual adventures:

- **Wrocław Dwarfs Go** - this app has been brought to you by Cubesoft, specialists in mobile technologies. This free app is available for Android. The app helps you to arrange and filter the dwarves using criteria such as popularity, number of hits, etc. and to measure the distance, locate them on the map and find the route. Additionally, the app will also help you to browse the dwarves' photos and tag those you have already visited. You can also like the dwarves, add your own photos and search your own browsing history.
- **Footsteps** - it is an application, which offers hundreds of already prepared city sightseeing tours. The whole project of this app was invented by specialists in cooperation with city representatives and city guides. Thanks to this app you can find some unexpected city routes, which will show participants the city from a completely different perspective. All of these aspects will provide you a real "city experience".
- **ActionTrack** - this app brings digital world to physical environments. ActionTrack allows you to experience different location-based activities all over the world. An activity may be for example a treasure hunt, a real-time team competition, a school test, an engaging and interactive school lesson, a corporate training event, a guided walk or drive, a marketing campaign or an interactive story. ActionTrack brings you interactive maps with checkpoints that can contain multimedia, information, interactive challenges, questions, route choices and much more. ActionTrack can offer you both outdoor and indoor experiences. You may encounter ActionTrack activities created for events, education, travel, marketing, sports, attractions, resorts and much more.
