THE CENTENNIAL HALL - MEETING WITH THE HISTORY

The Centennial Hall Complex is a historical meeting place in the centre of Wrocław. Apart from the Hall, which was erected in 1913, it also comprises the Wrocław Congress Center, Multimedia Fountain, Pergola and the outside grounds. In 2006, the Centennial Hall was inscribed on the UNESCO World Heritage List. The Complex has one of the most spectacular fountain in Europe, which delights with its water performances of colorful jets, music and visualizations displayed on the water screen. Maybe you will prefer a dinner with a view of the fountain? Why not! Participants will be able to discover amazing, modernist spaces, which are not available during standard sightseeing tour. The area of the Centennial Hall Complex is the perfect place to organize an unforgettable field game both inside the facility and outside it, for example a gala dinner in the open space of the Wrocław Pergola. Perhaps, you will be planning an extraordinary dinner with different cuisines? The area of the Centennial Hall Complex allows you to organize a food truck festival, where they will serve aromatic and unique dishes to event participants. Moreover, there is a major event potential when it comes to the areas in the surrounding of the facility. You can take advantage of them while organising physical activities for event participants. You and your participants can experience petanque game with a view of the monumental Hall or orienteering run among the green spaces of the Complex and near the Szczytnicki Park. All of these aspects will certainly provide everyone with unforgettable sports emotions. Or maybe you are planning to take event participants to the top of the dome of the Centennial Hall or iconic Wrocław spire, so that they can walk with their heads in the clouds? Thanks to the viral reality of the Visitor Centre, you can take them to different places, where human eyes do not reach.

THE WROCLAW STADIUM - NOT ONLY SPORT EMOTIONS

The Wrocław Stadium is a multifunctional and modern place offering a wide range of possibilities for organizers of various events. The facility is not only the football arena and mass events destination, but also the perfect place to organize incentive events. The modern and well equipped spaces of the Conference and Event Center will meet the expectations of the most demanding customers. In addition, the conference rooms, the banquet rooms or the fair areas have very flexible spaces, which can be easily adapted to the organization of events requiring unconventional solutions. The Wrocław Stadium has also many additional attractions to offer. You can chose between visiting every nook and cranny of the venue spaces combined with educational games, racing on a karting track or jumping from the roof of the Stadium. Racing on the track will allow you to experience the 1000 m adrenaline rush raceway. The event participants have at their disposal over 40 machines, enabling the development of the top speed of go-carts. The go-carts fleet includes both go-carts for adults, children and tandems (double go-carts). Apart from the go-carts adventure, extreme jumps from the roof of the Stadium can be no less exciting experience. The Dream Jump Stadium is the amazing jump, which was created to extend the freefall moment. Thanks to the patented system of ropes combination, the jump from the 40-meter Stadium lasts as much as from a bungee crane from 90 meters! Moreover, the venue enables you to organize unusual and engaging field games for different groups of participants. It will allow them to discover ecological solutions in the facility and find some "hidden" rooms, which are inaccessible during a standard sightseeing tour of the Wrocław Stadium.

THE MYSTERIOUS WROCLAW

Wrocław is a city full of attractions, both during a day and after a twilight. There are many places worth seeing in the evening. Event participants can explore the city from the banks of the Odra River. Majestic buildings and churches reflect their shapes in the River current. An unusual walk along Wrocław nook and cranny, in the light of the lanterns, will intensify the new experience during the incentive event. Moreover, if we add some mysterious and amazing stories like from the best thrillers, the evening memories will certainly stay with the participants for a long time. Wrocław also offers various forms of transport, such as city bikes, scooters and electric scooters, which can beef up all unconventional events.

In addition, it is well worth to take advantage of a Wrocław historic tram ride around the city. It will create the opportunity for the participants to explore one of the most attractive and significant city areas. The combination of all these elements will make every Wrocław incentive event a unique adventure for its participants.
